One of your teachers favorite bands from the period: Led Zeppelin, playing live on stage

I want to know more about...

By Mikkel Kiilerich

The 60's! The cradle of modern music. But what do you actually know about the bands or the artists back then? Pick one! You will now have time to dig deep into the history of the people behind the music. Using the internet, books and cd's you will create an overview of the bands career and you will even try to reflect and argue why the music appeals to you (or not).

- First: Spend some time thinking about which band or artist from the 60's could be the right for you. Is it easy or at least possible to dig up information online? If not, maybe you are better off choosing another band.
- Material has to be written and **deadline is 14/9**. Upload it on Viggo.
- Put down key facts about the band. I.e. discography, biography, members etc.
- Pictures are mandatory!
- Mandatory is also a section where you state why the music appeals so much to you.
- It has to be entertaining to read, so a mixture of fun stuff and cold facts is a must.
- Length: 9th grade: 300-400 words
10th grade: 500-600 words
